Re: California Proposition 65 Compliance Statement

WARNING: Our products may contain chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov

WHY ARE WE TELLING YOU THIS?

As of August 2018 the State of California has changed the requirements of the "Prop 65" law. We must now list on our website any possible chemicals that can cause cancer, birth defects or other reproductive harm.

Our products may include **lead** and/or **nickel**.

To put it simply, in order to manufacture our products, we purchase components and materials manufactured all around the world. We are a small company and therefore do not have the resources to test every component we use in the manufacture of our products down to the last nut, bolt and washer. Do not eat, drink or smoke any of the products we manufacture. Always wash your hands after touching. If our products are used properly, there should be no contact with any parts containing harmful chemicals.

A handwritten signature in blue ink that reads "Miille". The signature is written in a cursive, flowing style.

Joyce Miille
Vice President
Miille Applied Research Co., Inc.
